

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

31191076
A FEW years ago, a writer to one of our great dailies expressed the hope that the advocates of simplified spelling would issue a manual containing, "in one alphabetical order and convenient for quick consultation, all the terms on the simplification of which they have agreed," instead of referring the public to the half hundred bulletins they have issued for the information it requires. Three years have passed by since this suggestion was made, and notwithstanding the fact that many inquiries for a manual of this kind have been received none has yet been issued. The purpose of the compiler of this book is to provide such an alphabetical guide. The vocabulary consists of the simpler forms of spelling that have been recommended for adoption from time to time by the American Philological Association and the Simplified Spelling Board, many of which were announced by the United States Department of Education in its Bulletin Number 202, and others, particularly the simplifications of the three hundred words recommended by the Simplified Spelling Board in the Board's Circular Number 5, as the bulletin entitled "Simplified Spelling for the Use of Government Departments" issued from the office of the Public Printer, Sept. 4, 1906, by direction of the President of the United States under date of Aug. 27, 1906, and the Simplified Spelling Board's "Alfabetic List," Circular Number 23, issued March 6, 1909.

In the compilation of this book the writer is not concerned with the reasons why this or that word should be simplified. This phase has already received the attention of many of the foremost scholars in English linguistry. All he has aimed to do is to provide in one volume a guide to the forms that words take when the rules for simplification recommended by these scholars are applied.

This Dictionary aims to supply the need of those persons who have been sufficiently interested in the Simplified Spelling Movement as to ask for an alphabetical list of words simplified according to rule. The vocabulary is not exhaustive, but the number of words it contains is sufficiently large to cover the various classes of simplifications recommended by the rules already referred to. It may be enlarged at will. The rules, classified according to number and to the societies that have recommended them, will be found printed elsewhere. To indicate words that are simplified according to the rules promulgated by the American Philological Association, the symbol * is printed immediately after the word. Words simplified in harmony with the rules recommended by the Simplified Spelling Board are indicated by the letter s printed in the same manner. Where the form of the word is affected by the rules of both Societies both letters are used, as *colleag, *ass*.

To provide supporters of the Simplified Spelling Movement with the adequate means for determining how each simplified word should be divided at the

end of a line, every word is syllabicated, showing, wherever necessary, the primary stress (indicated by the prime mark (') after the accented syllable), the secondary stress (indicated by the secondary mark (") after the accented syllable), and the hyphen (-) which indicates syllabic division in such parts of a word as are not accented. The reader will understand that any word may be divided wherever primary or secondary accent is indicated as well as wherever the hyphen is shown. As compound words in great number may be formed by the combining of one word with another (as, *table-cloth*, *door-nail*, *dormer-window*, *friction-clutch*, *road-house*, *high-ball*, *stomach-pump*), these are not, in general, included. As an additional convenience, the grammatical character of each word is indicated, being followed by an abbreviation, printed in italic type, indicating its particular part in speech; as, *a.* for adjective; *n.* for noun; *v.* for verb; *adv.* for adverb, etc. In every case the abbreviation is that commonly used for the same purpose in dictionaries.

As Circular Number 26, published March 24, 1913, and containing additional rules of the Simplified Spelling Board, was issued after the editorial work on "Funk & Wagnalls New Standard Dictionary" had been completed, the rules that it announced could not be applied. In the following pages, therefore, only such words as the Board itself selected for examples, illustrating the application of the rules, are included.

The compiler ventures to hope that the following pages will be found to adequately supply the need for which they have been compiled, and prove acceptable to supporters of the Simplified Spelling Movement as well as to the people who would have given that movement their support had they been able to secure a simple, yet comprehensive, manual for their guidance. It should be borne in mind that the spellings printed in the pages that follow are not mandatory in any sense of the word; they are recorded there as recommended for the use of the general public by eminent scholars who have devoted years of labor to the subject of the amelioration of spelling of English words.

TEN RULES FOR SIMPLIFIED SPELLING

Recommended by the American Philological Association

THE Philological Society of England and the American Philological Association took joint action on the amendment of English spelling in 1883, and on the basis of it twenty-four joint rules were printed in the proceedings of the American association for that year (see next page). It was known that the application of these rules was difficult, and that an alphabetic list of amended words must be made. A pamphlet of the English society and a paper in the Transactions of the American association for 1881 are in official context for interpretation. The corrections are in the interest of etymological and historical truth, and are to be confined to words which the changes do not much disguise from general readers.

In the following list, as in the twenty-four rules, many amendable words have been omitted for reasons such as these:—(1) The changed word would not be easily recognized, as *nee* for *knee*: or, (2), letters are left in strange positions, as in *edg* for *edge*, *casq* for *casque*. (3) The word is of frequent use. Final *g=j, v, q, z*, and syllabic *l* and *n*, are strange to our print but abundant in our speech. Many of them are in the list: *hav, freez, singl, eatn*, etc.; but *iz* for *is*, *ov* for *of*, and many other words, as well as the final *z=s* of inflections, are omitted. (4) The wrong sound is suggested, as in *vag* for *vague*, *acer* for *acre*. (5) A valuable distinction is lost: *casque* to *cask*, *dost* to *dust*. (6) The derivation is obscured: *nun* for *none*, *dun* for *done*, *munth* for *month*. (7) The change leads in the wrong direction.

Words doubtful in pronunciation or etymology, and words undecided by the associations, however amendable, are omitted. Inflections are printed in italics.

The rules proposed are as follows:

1. e.—Drop silent *e* when phonetically useless, writing *-er* for *-re*, as in *live, single, eaten, rained, theatre*, etc.
2. es.—Drop *a* from *ea* having the sound of short *e*, as in *feather, leather*, etc.
3. o.—For *o* having the sound of *u* in *but* write *u* in *above* (*abuv*), *tongue* (*tung*), and the like.
4. ou.—Drop *o* from *ou* having the sound of *u* in *but*, in *trouble, rough* (*ruf*), and the like; for *-our* unaccented write *-or*, as in *honour*.

5. u, ue.—Drop silent *u* after *g* before *a*, and in nativ English words, and drop final *ue*: *guard*, *guess*, *catalogue*, *league*, etc.
6. Dubl consonants may be simplified when fonetically useless: *bailiff* (not *hall*, etc.), *battle* (batl), *written* (writn), *traveller*, etc.
7. d.—Change *d* and *ed* to final *t* when so pronounced, as in *looked* (lookt), etc., unless the *e* affects the preceding sound, as in *chafed*, etc.
8. gh, ph.—Change *gh* and *ph* to *f* when so sounded: *enough* (enuf), *laughter* (lafter), etc.; *phonetic* (fonetic), etc.
9. s.—Change *s* to *z* when so sounded, especially in distinctiv words and in *-ise*: *abuse*, verb (abuze), *advertise* (advertize), etc.
10. t.—Drop *t* in *tch*: *catch*, *pitch*, etc.

President: Professor Charles H. Grandgent, Harvard University; *Chairman of Trustees:* Professor Brander Matthews; *Treasurer:* Gano Dunn; *Secretary:* Henry Gallup Paine, 1 Madison Avenue, New York; *Trustees:* James W. Bright, Professor of English Literature, Johns Hopkins University; Melvil Dewey, Author, and Library Economist; Gano Dunn, President, J. G. White Engineering Corporation; Charles H. The Simplified Spelling Board was organized in March, 1906, for "the purpose of expediting this natural process (the simplification of English spelling) of change which has been going on for centuries, and, as far as may be possible, of guiding it in the direction of simplicity and economy" and to "urge educated people everywhere to aid in the gradual simplification of English spelling, and thus to make the English language more and more easy to acquire and to use." (*Simplified Spelling Board, Circular No. 1, March 21, 1906.*) The number of adherents to its principles exceeds 75,000.

THIRTY-ONE RULES

Recommended by the Simplified Spelling Board

The following are the rules under which the simplifications contained in the list are groupd. They are condensest from the circulars mentiond, and are arranged in the alfabetic order of the letter or letters, or the suffix, affected.

'*RULE*' here means simply a recommendation that applies to a number of words having the same irregularity of spelling. To facilitate acceptance it was deemd expedient in some cases to restrict the rule to a limited number of the words in the class. Any one who chooses to extend the rule at once to all the words of a given class is of course free to do so.

After each rule is given a list, either of all the words affected (if they are not many), or of all the words mentiond in the original rule, or of a few examples of the large number coverd by the rule. In the latter case "*Ex.*" ('*Examples*') is prefixt, and "*etc.*" is added. If the official recommendation applies to all words containing the letter, sequence of letters, or suffix, affected, in the pronunciation indicated, the word *RULE* is printed in capitals. For some small classes and for isolated amendmets no rule is here given.

The Greatest Single Volume Reference Work Ever Produced

THE FUNK & WAGNALLS NEW Standard Dictionary

Retaining all of the characteristic superior features of the old Standard, which have given that work world-wide fame, this yet more stupendous book adds others exclusive and of immense value. Here are but

A Few of Its Many Points of Surpassing Superiority:

ONE ALPHABETICAL ORDER throughout its entire vocabulary, an immense time-saving feature,—no divided pages, supplemental vocabularies, etc.

THE COMMON MEANING OF EVERY WORD is given in its first definition and the obsolete meaning last as it should be.

KEY-WORDS TO THE CONTENTS of every two facing pages greatly aid consultation.

TWO KEYS TO PRONUNCIATION are placed at the top of every page.

COMMON ERRORS OF SPEECH are systematically corrected.

A SYSTEMATIC METHOD OF COMPOUNDING words reduces compounding to a science.

RULES GOVERNING THE PLURALS of nouns and their formation are a great help.

GRAMMATICAL AND RHETORICAL CONSTRUCTION are aided by the special rules which the New Standard explains.

THE SYLLABIC DIVISION OF WORDS is shown by the simplest possible system.

SYNONYMS AND ANTONYMS are given in such numbers as are nowhere else found.
